CONTENTS

On the effect of torsion on a helical pipe flow. M. Germano *page* 1

Boundary-layer pressures and the Corcos model: a development to incorporate low-wavenumber constraints. J. E. Ffowcs Williams 9

The generalized Lagrangian-mean equations and hydrodynamic stability. A. D. D. Craik 27

Wave-induced longitudinal-vortex instability in shear flows. A. D. D. Craik 37

A new surface-streamline flow-visualization technique. L. S. Langston and M. T. Boyle 53

On the stability of boundary-layer flow over a spring-mounted piston. M. S. Howe 59

Single-mode theory of diffusive layers in thermohaline convection. D. O. Gough and Juri Toomre 75

Time-dependent solutions of multimode convection equations. Juri Toomre, D. O. Gough and E. A. Spiegel 99

Double-diffusive convection with large variable gradients. I. C. Walton 123

Hamiltonian structure, symmetries and conservation laws for water waves. T. Brooke Benjamin and P. J. Olver 137

Coaxial scattering of Euler-equation translating V-states via contour dynamics. Edward A. Overman and Norman J. Zabusky 187

Longitudinal-dispersion calculations in laminar flows by statistical analysis of molecular motions. Raymond J. Dewey and Paul J. Sullivan 203

Heat transport and temporal evolution of fluid flow near the Rayleigh–Bénard instability in cylindrical containers. R. P. Behringer, and Guenter Ahlers 219

Convective pattern evolution and secondary instabilities. J. P. Gollub, A. R. McCarriar and J. F. Steinman 259

Fluid dynamics and mass transfer in a gas centrifuge. A. T. Conlisk, M. R. Foster and J. D. A. Walker 283

Observations of inertial waves in a homogeneous rotating fluid. K. E. Heikes and T. Maxworthy 319

Nonlinear analysis of cavity flows around arbitrarily shaped bluff bodies in a constrained flow. K. Sato 347

Oscillatory flows at intermediate Strouhal number in asymmetric channels. Ian J. Sobey 359

Note on the effect of surface tension on water waves at an inertial surface. P. F. Rhodes-Robinson 375

Effects of inertia on the diffusion deposition of small particles to spheres and cylinders at low Reynolds numbers. J. Fernández de la Mora and D. E. Rosner 379

A simple model of mixing and chemical reaction in a turbulent shear layer. J. E. Broadwell and R. E. Breidenthal 397

Three-dimensional stability of vortex arrays. A. C. Robinson and P. G. Saffman 411

Free convection in vertical gaps. J. N. Koster and U. Müller 429

Electrochemical measurements of mass transfer between a sphere and liquid in motion at high Péclet numbers. S. S. Kutateladze, V. E. Nakoryakov and M. S. Iskakov 453

Buoyancy–thermocapillary instability: the role of interfacial deformation in one- and two-component fluid layers heated from below or above. J. L. Castillo and M. G. Velarde 463

Local isotropy and anisotropy in a high-Reynolds-number turbulent boundary layer. Patrice Mestayer 475

Turbulence and waves in a rotating tank. E. J. Hopfinger, K. Browand and Y. Gagne 505

Review

Deep Water Gravity Waves (Weak Interaction Theory), by Bruce J. West 535
